solutions, which are among the most envi- a real revolution in construction. ronmentally friendly aluminum alloys in our industry. Hydro CIRCAL is a range of high quality aluminum alloys made from nearly 80% post-consumer recycled aluminum. This includes old materials such as facades and windows that have been removed from buildings and fully recycled. The process of melting down aluminum for reuse uses only 5% of the energy required to produce virgin

The RC2 security rating defines the door's level of resistance to burglary, particularly to basic methods of attack, according to DIN 1627. An optional security package further enhances your protection with P4A glass, reinforced hinge-side security features and certified burglar-resistant cylinders. These advanced solutions effectively increase the level of security by protecting the door from unauthorized access and removal attempts.
